May 2004

Data Dot Technology

This program has been arranged with the Sydney Branch of the Ulysses Club and has been extended to all branches.

DataDot Technology is a unique theft deterrent system specifically designed to reduce professional theft of motorcycles.

Figures provided by the National Motor Vehicle Theft Reduction Council shows for the years 2001/2003, 6210 motorcycles were stolen however only 27% were recovered.

By applying DataDots, the owner adds an additional 2,000 identifiers to their motorcycle.

Included in the kit is a vial containing 2,000 DataDots all with the motorcycles VIN, applicator, template showing how and where to apply together with warning decals.

The RRP of the Kit is \$199 inc GST, however for Ulysses members the price is \$125 inc GST.

For each Kit that we sell, we will make \$20 for each sale.

Order Forms are available from President Hans, or the Secretary/Treasurer.

Presidents Report:

Hi One and All

Not a lot to talk about really but we have had another quarterly meeting and most would agree that the venue as suggested by Tony was great.

The Data Dot company have through the Sydney Branch arranged a discount on their vehicle identification system and the Data Dot people have sent us some order forms if any one is interested contact John Van Der Heul or my self for more details.

The weather has been a bit temperamental but the rides have still been very good and in some cases fined up once we got going so don't let the forecast scare or fool you.

So until next month I look forward to seeing you out there, ride safe and enjoy life to the max like only a Ulysses motorcyclist can !!!

Hans

Club Shirts

Club shirts are available, Hans has shirts in-stock for you to try on for size. Contact Hans Ph: 4472 3543 for costings etc.
